

IS-BAH Certification for Sky Valet – Lisbon guaranteeing best practices in terms of safety

Lisbon Airport's Sky Valet FBO stopover has just obtained IS-BAH certification (International Standard for Business Aircraft Handling).

Created by Business Aviation operators and professionals, IS-BAH is issued by the International Business Aviation Council after an independent audit. It certifies that the Sky Valet stopover in Lisbon meets demanding criteria, guaranteeing best practices in the fields of safety, security and the environment which are related to ground handling.

This certification forms part of the development strategy for Sky Valet (first European group for Business Aviation ground handling) in an effort to establish a pan-European FBO network in the following key regions: Cannes Mandelieu (IS-BAH Level 2 certified), St-Tropez, Paris-le Bourget and throughout all of Spain and Portugal.

Felipe Carvalho, General Manager for Sky Valet Lisbon said: *"We are very proud of the work carried out by our teams to obtain this certification which demonstrates our professionalism and investment to satisfy our customers, including the most demanding, and thus to reaffirm their confidence. "*

Michel Tohane, Director of the General Aviation Business Unit and Sky Valet said: *"Sky Valet is the leader of its sector in Europe and aims to be the market leader in terms of quality of service. The certification for the Sky Valet stopover in Lisbon marks a new step on the path of excellence, after Cannes Mandelieu Airport achieved IS-BAH Level 2 certification in spring 2017. "*
